Board of Trade Luncheon Wednesday, December 6

The Beiseker Board of Trade have accepted an invitation to make their return visit to our local Board on Wednesday evening, Dec. 6th. It is hoped that as many members as possible and their wives, will be present to welcome them.

The luncheon will be held in the U. F. A. Hall and will commence at seven o'clock.

The Entertainment Committee are busy making arrangements for a programme in connection with the event, and a speaker will be here from Calgary.

Gasoline Thieves Caught in the Act

Early Tuesday morning during that period of time when all good citizens are fast asleep Constable Fenn was on night patrol, he picked up two strangers stealing gas from the Government graders, being caught in the act.

They appeared before Police Magistrate A. W. Gordon on Monday morning charged with stealing gasoline. One pleaded guilty and the other pleaded not guilty.

The man that pleaded guilty was fined \$5.00 and costs, the other was found guilty and taxed costs with a fine.

Annual School Fair Meeting

The annual meeting of the Crossfield School Fair and the Calf Club will be held in the Fire Hall at 2 p.m. Saturday, Dec. 2nd. Every one interested is invited to attend.

Ladies' Curling Club Elect Officers

A meeting of the Ladies' Curling Club was held at the home of Mrs. Miller on Wed., Nov. 29th. Officers for the coming season were elected as follows:

Hon. Pres., Mrs. Wm. Pugue; President, Mrs. S. H. McClelland; Vice-Pres., Mrs. R. T. Amery; Sec-Treas., Mrs. Jas. Belshaw.

Ice Committee—Mrs. Heywood Draw Committee—Mrs. C. H. McMillan, Mrs. Miller, Mr. Glen Williams.

Entertainment Committee—Mrs. R. M. McCool, Mrs. Longmire, Mrs. Belshaw, Mrs. Metheral.

Membership Committee—Mrs. Tredaway, Mrs. Miller, Mrs. McCool, Miss Stella Gordon.

To The Jimmies

When Salom was asked if he had given his country the best laws, he answered "the best they are capable of receiving." This is one of the most profound utterances on record. It contains the whole philosophy of history. When Christ gave us his doctrine the same could not have been true.

Look what a difference has made in the social and economic world since that time. Another world could not have been necessary. The Douglas system is evidently so far above everybody but a few intellectual like yourself that we are unable to fully appreciate its many excellencies without stumbling over its weakness. Can you explain why this system which did not originate during this depression (nor was Douglas the original deviser of its theory), has never been taken seriously in the place of its origin where working people are in such great majority, and where the country is famed for the honesty of its business and the soundness of its finance.

We are being swamped these days with advice, most of it worthless babble, gleans and glitters of intellectual soap and water bubbles, so often mistaken for genius as are pyrites for gold; Skill in fencing with tongue instead of constructive criticism.

Great men never seem to be so scarce as when needed (like policemen) but on the contrary history shows us that small men are never so bold in infesting office as when mediocre and incapable pretence are most dangerous to common welfare.

France replaced Mirabeau, Vergniaud and Gardey with such provincial pretenders as Reding, Marat and Quinton. England had its Bump parading.

One of the serious problems today is that genuine loyalty and honor seem to be lacking in high places. Men took their sacred oath of office as lightly as their private obligations. A clean up here is more necessary than a change of System.

OBITUARY

MR. W. McRORY

We regret to record the death of Mr. Wilson McRory, one of Crossfield's prominent citizens who passed away on Friday last at his home here. The deceased gentleman had not enjoyed good health for the past two years. The news of his passing cast a gloom over the village where he was held in high esteem.

Born in Sydenham, near Kingston, Ontario, the late Mr. McRory came to Macleod in 1897, later residing in Manitoba before settling in Crossfield in 1911. Mr. McRory was 75 years and 8 months of age.

During his residence here in Crossfield he has rendered valuable and generous service to the community, being closely associated with the social, religious and municipal life of the district. He occupied the position of Secretary-Treasurer of the Village for twenty years; also Secretary-Treasurer of the Roseland Municipality for sixteen years from which position he was forced to resign a year ago on account of ill health. Religious life also claimed his interest and attention, being a member of United Church. At the time of his demise he was a member of the official board, and an elder of the church. Mr. McRory was an active member of the Masonic Order for 41 years and was one of the esteemed Past Masters of the Crossfield Lodge.

Surviving are his wife, three sons, J. Lloyd, Crossfield, Chester G., Winnipeg; Eric S. of Calgary, and a daughter, Mrs. A. Young of Macleod.

Funeral services were held on Monday last, first at his late residence, afterwards at the United Church. Rev. Dr. George A. Dickson of Knox United Church, Calgary, officiated, and referred during his discourse to the sterling qualities of the deceased gentleman and the high esteem in which Mr. McRory must have been held as was shown by the many beautiful floral tributes decorating the casket and around about it; also by the large congregation which was present to pay their last respects to one who had gained their affection and esteem.

During the service Mr. W. Gibson sang "Beautiful Isle of Somewhere" and during the removal of the remains the choir sang "Peace Perfect Peace".

The following acted as pall-bearers: A. A. Halibay, Wm. Lantz, Geo. Murdoch, R. D. Sutherland, A. S. Gough, and F. Purvis. A large cortege following the remains to Calgary, where the last rights at the grave side was also performed by Dr. Dickson. Foster & Foster had charge of the funeral arrangements.

Collicutt & Son Win Major Awards at Toronto

Frank Collicutt & Son, Crossfield's veteran Herford breeders, practically swept the boards for the third year in succession at the Toronto Royal Winter Fair this week.

Following are the awards:

Six first prizes, a junior and grand female championship, a reserve senior championship, and two reserve championships. In addition he had first in junior herd and second and fourth in both the get of sires and progeny classes.

This spectacular showing is the more remarkable by reason of the fact that only eight animals went from the Collicutt ranch for the competition.

The Central Bank

Every political party that is slanted to the right is in favor of a Central Bank and so are we, but why pass the buck?

Just as soon as this bank is established and is owned and operated by private capital, just then will the purpose of this bank be defeated.

BORN—To Mr. and Mrs. Arthur Schulz of Bottrel on Nov. 29, a daughter.

Will Inflation Benefit?

One of the many results flowing out of the Great War was the development of a narrow nationalism which found expression in many ways and had a profound effect upon not only national policies, but in forms and methods of government. Out of the Great War grew an economic warfare more intense than in the years that preceded that titanic struggle. That economic war led to the use of tariffs, quotas, and other trade restrictions on a scale hitherto unknown. All nations engaged in it, some reluctantly, but because they were forced into it by the actions of other nations.

As this economic warfare progressed it inevitably led to still another war—a war of exchange. The value of the currency of one nation rose or fell in relation to the value of the currencies of other nations, and as it rose or fell it directly affected the trade of the nations as well as the whole financial structure of all, and the ability of one group of people to meet its obligations to another group.

From this it was but a short step to a third form of warfare now being waged—a war of currencies. Some nations—most of them—abandoned the gold standard, but a few still adhere to it. Then began the struggle of the currencies. Abandoning the gold standard was a measure of inflation. The next step was the more or less gradual reduction of the value of national currencies in terms of gold, the object being to raise prices which had fallen to a disastrously low ebb. In other words, policies of inflation were embarked upon.

But always in war, no matter the nature of the struggle, one party or the other always endeavors to outdo the other. It is so in physical warfare; it is true in any tariff war. It is equally true in a war of inflation. When one country embarks upon a policy of inflation, even though it is primarily a matter of domestic concern alone, it immediately has repercussions in other countries. So when one country proceeds with a policy of inflation, and persists in it, sooner or later other countries will follow suit, and, in another suit, will, of course, seek to go other countries' "one better."

Whatever may be said in favor of a degree of inflation on the one hand, or deflation in the other, to meet changing economic conditions—and a country engaging in either the one policy or the other always proceeds on the assumption that great care will be exercised, and the policy fully controlled to prevent it getting out of hand—the net result invariably is that it does get out of control, and the stage of affairs is made worse rather than improved. The cost of financial recovery made more difficult and of longer duration, with losses made heavier.

A policy of inflation is being applied in the United States at the present time. As always, President Roosevelt is anxious to keep it within bounds, but there are great and powerful influences at work to carry it far beyond what the President desires and has in mind. Can the situation be controlled? When Congress re-assembles, indications are not lacking that great pressure will be applied to put the printing presses to work turning out billions of paper money, in addition to the present inflationary policy of decreasing the gold value of the dollar. And Congress is still supreme in the United States. It conferred very extensive emergency powers upon the President, giving him almost dictatorial powers. But it can withdraw those powers, or it can itself go much farther than the President and his advisers deem it wise to go.

And Canada cannot be indifferent to or prove immune from the effects of United States policy, whatever it may be. Our trade and other relationships are too closely interwoven, and our financial undertakings, both public and private, so entwined that Canada will be directly affected. Whether we it or not, Canadian policy must, of necessity, be governed to some extent, —possibly a large extent—by United States policy in this matter.

Inflation and deflation, and their consequences, may be traced throughout the course of history, dating back to the years B.C., and the lessons of history teach us that inflation appears to have generally, if not always, ended in disaster. There was at first always the intention of control, but the movement usually ended by breaking all bounds. Increased purchasing power through inflation is only temporary; higher prices stimulate over-production and check consumption; new debts appear, and a return to stability is increasingly difficult.

The depression beginning in 1929 was preceded by wild speculation, encouraged and made possible by an expansion of credit, but encouraged and stimulated by installment buying on a scale never before witnessed. Many were the warnings issued at the time of the wholesale expansion of credit, and the general instinct of installment buying was in progress. It could be seen by one willing to pause and consider that such installment buying—all based on credit—could not go on indefinitely; that a point must be reached when and where millions of individuals committed to installment payments would reach the end of their purchasing power, having used up all their credit and pledged all their resources. The saturation point was reached late in 1929 and the crash followed.

People had bought land, houses, motor cars, radios, equipment of all kinds, and many luxuries all on the promise to pay, weekly, monthly, yearly installments. The time came when they could make no more commitments, so production stopped, and with its stoppage, millions were thrown out of employment and were thus placed in a position where they could not meet their deferred installment payments. Prices fell, and everybody sustained losses.

Inflation might temporarily raise prices, just as speculation and installment buying—which, after all, was inflation pure and simple—did raise prices. But one form of inflation can not overcome the evils caused by another form of inflation.

Cause Of Weather Changes

Scientists Find Evidence That Electricity Responsible For Variations

Evidence that electricity controls weather all over the world was announced to the National Academy of Sciences at Cambridge, Mass. The electric control runs in a definite cycle, causing rains, drouths and heat every 23 years, with comparatively minor variations for individual localities. This electric cycle comes from the sun.

"The weather of 1956," said this report, will have the same general pattern—differing, of course, in day by day details—as the weather the world last experienced in 1911. "Next summer should be the same general weather pattern as the world experienced during the summer of 1911. The discovery marks a long step forward toward the day of long-range forecasting."

Woman's love for ribbons may be accredited to her having originated from a rib.

A Tired, Worn Out Woman Can't Make a Happy Home

There is no happiness in the home when the mother is sick and worried by the never ending household duties. She gets run down and becomes nervous and irritable, has shortness of breath, faint and dizzy, can't sleep, and gets up in the morning feeling as tired as she went to bed, and is downhearted and disengaged.

Milburn's H. & N. Pills will soon convince women it is not necessary to suffer, as they build up the nervous system and bring back the former health and vigor.

Seizure Of Einstein's Property Is Ordered

Everything To Be Confiscated In Favor Of Germany

Secret police have ordered the seizure of all property of Dr. Albert Einstein, famous physicist, and Mrs. Einstein by virtue of the law for confiscation of individual property.

Legal notice of the seizure was served in the official game Reichenberg which listed "all mobile and immobile goods, particularly bank accounts and other deposits" to be confiscated in favor of the Prussian state.

Prince George Was Host

The Prince of Wales and Prince George were present at a dinner in London recently in celebration of the passing of the Factory Act. Prince George, in his capacity as a Home Office Inspector, acted as host to his brother.

The 40-hour week probably will be adopted in Italy.

New Kind Of Glass

Tests Made In Germany Show That It Neither Splinters Nor Breaks

Glass which neither splinters nor breaks has been produced in Germany. In tests made recently three adults used a long narrow sheet as a seesaw. The glass shows an elasticity similar to that of highly flexible steel. A heavy steel ball dropped from a height of 10 feet left no impression. The glass is produced by a special heating process. Railway and automobile officials are interested in the product.

THREE ILLS ROUTED

Health Tip From Woman Of 67

"For headache—constipation—rheumatism—I use Kruschen. And since I have used it, I am in better health. In fact, I hardly ever wake with those bad headaches and that general feeling of lassitude. Kruschen has helped me beyond words. I am 67 and feel young," thus writes Mrs. M. G. Quentin.

It is reasonable to ask why it is that headaches, constipation, and rheumatism should yield so completely to Kruschen? What is the secret?

Kruschen's effectiveness against these different complaints? The secret is open one. It is remarkable in its action on everyone else to see six vital mineral salts. That is the secret. Each of these six salts has an action of its own, and it is remarkable to see how other can—and does. Stomach, liver, kidneys and digestive tract are all benefited and toned up to a top-notch condition of efficiency.

Belgium Closing Four Prisons

Crime Seems To Have Fallen Off Since War

Crime has fallen off to such an extent in Belgium since the armistice that four of the thirty-one prisons are to be closed. Prison officials attribute this state of affairs to the leniency of the courts and the operation of the first-offenders act. They say also that minors who formerly went to prison now go to the reformatory, which is not listed as a prison.

Formation Of A Committee To Investigate The Causes Of Low Water Levels In The St. Lawrence Ship Canal And The Port Of Montreal And To Recommend Remedial Measures For Low Water

Formation of a committee to investigate the causes of low water levels in the St. Lawrence ship canal and the port of Montreal and to recommend remedial measures for low water which prevailed this season was urged on the Dominion government by J. W. Nicoll, president, at a meeting of the Shipping Federation of Canada.

Study Bees In Glass Hive

School pupils at St. Louis are able to watch honey bees in doing their work inside a glass hive at the educational museum of the Board of Education here. The bees leave their hive through a pipe which leads outside the museum building.

Collects Songs As Hobby

L. H. Pevey, of Corpus, Texas, has a collection of old songs and ballads as his hobby. He already has gathered more than 11,000 in a scrap book that weighs 100 pounds. The collection steadily grows.

A record consignment of cattle serum weighing nearly 2½ cwt. was sent by air from Berlin to England, to combat an outbreak of foot and mouth disease in Cheshire.

Western Problems

Edmonton Editor Addresses Canadian Club At Ottawa

Suggestions for the solution of some of the problems with which western Canada is now grappling were placed before the Canadian Club at Ottawa by J. M. Inrie, of Edmonton.

Canada should co-operate to the full in the London wheat agreement.

Mr. Inrie urged. Since this country had been the chief sinne in expanding its wheat acreage, it should feel thankful that the reduction demanded was not greater.

Diversified farming, with concentration on premium select hogs for that market in the United Kingdom which was guaranteed to Canadian producers up to 2,500,000 hundredweight per annum, was advocated. Mr. Inrie also deplored that the indiscriminate and scattered settlement of the west should have resulted in establishing families on unproductive and untenable lands! He urged a redistribution and a general thickening of settlement.

Refuses Remuneration

Member Of Irish Dail Eireann Will Not Accept Pay

Frank MacDermott, descendant of King Roderic O'Connor, refused any remuneration for acting as a member of the Dail Eireann, the parliament of the Irish Free State. When the department of finance insisted on presenting the \$150 a month salary because, it argued, the amount was real, MacDermott said he would buy Irish sweep tickets with money in the name of Roscommon County Council, and if lucky the winnings will be used to benefit Roscommon farmers either through lower taxes or welfare projects.

Claims Fastest Train

Average Speed Of Germany's "Flying Hamburger" 78 Miles An Hour

Germany claims to have the fastest railroad service in the world.

The "Flying Hamburger," famous

motor-driven rail Zep, in regular service between Berlin and Hamburg, attains an average speed of 78 miles an hour, whereas the fastest British train, running between London and Swindon, averages 72 miles, and the fastest French train, Paris-Quentigny, only 66 miles.

During experiments conducted by the German federal railroad company with another motor-driven train, speeds up to 84 miles an hour have been attained.

Hubby (reading) "X-Know, I don't

wonder what exactly this writer fellow means by 'gems of thought'?"

Wife—Oh, something like that ring you're always promising to buy me.

Fame Of Canadian Poultry Once More Demonstrated At World's Congress Held In Rome

Canada's world-wide fame for efficiency and the high quality of her poultry has once more been fully demonstrated. With the return from the Fifth World's Poultry Congress, which was held at Rome, Italy, F. C. Elford, Dominion Poultry Husbandman, official co-delegate with W. A. Brown, Chief of the Poultry Division, Dominion Live Stock Branch, some specially interesting information is being obtained with regard to this historical meeting.

It was the only exhibition of live birds ever given in the official records, a fact which created widespread interest, visitors from all parts of the world arriving at the Congress exhibit demanding to be shown the birds with the Government certificates.

Canada was represented by a small but attractive educational exhibit and by a number of registered R.O.P. and exhibition bred birds. When the live bird exhibit was being prepared, and because the birds were first promised by the Canadian National Poultry Record Association, it was considered better business not to sell these birds, but to donate them to persons, institutions or governments where they would do the most good for Canada. Among the birds that were donated was a trio of Chanteliers to His Holiness the Pope, several trios to the Italian Government and a trio to the British Consul General in Rome.

There were also the two official delegates already mentioned and in addition, a number of individuals who attended their private capacity. The educational exhibit told the story of Canada's national breeding policy; illustrations showing poultry instruction in schools and with boys' and girls' clubs, farmers' flocks, the interior of a poultry laboratory, poultry culling and selection, R.O.P. flocks, laying contests and registration, marketing, standardization, grading, etc. The attractiveness and the completeness of the story made the Canadian exhibit a very popular one.

One remarkable point about the Congress was that it marked the re-opening of the Market of Trajanus after a period of 2,000 years. During all that time the market-place had been lying buried among the ancient ruins of Rome, and twenty centuries ago had been the popular produce market where the Roman citizens purchased their meat and poultry from the farmers. These ruins have been dug out and repaired and significantly enough the reopened market was first used for the educational and live bird exhibits of the Fifth World's Poultry Congress. It was here in the Capital that the cackling of the sacred geese prevented the capture of the ancient Roman citadel by the barbarians, so that the historic setting of the Market for the Congress was especially appropriate. However, the six floors and the numerous stairways of old stone steps were not the most convenient for an exhibit of this kind, nor the most advantageous for the attendants who had to climb five or six stories from one exhibit to another.

The Congress sessions were held in the building of the Agricultural Institute, and were attended by delegates from practically every European country and from Japan, Palestine, Australia, New Zealand, South Africa, the United States and Canada.

These congresses are the tri-annual meetings of the World's Poultry Science Association, and professor Antonio Ghigi of Italy was selected General director and his next president.

The delegates were given every opportunity for sight-seeing, which included Rome and its environs, Naples, Pompeii, Vesuvius, etc. On two afternoons, sections of Italy were shown where swamps had been drained and the land reclaimed for agricultural purposes. The stupendous work done by the Mussolini Government was made apparent by a visit to places such as Littoria, where 65,000 acres ten years ago was a small part of covered a distance of several feet of water, today reduced land being shaped into farms. A part of this is devoted to cultivated farms inhabited by a happy population, with the death rate from malarial fever almost nonexistent.

Machinery for making dishes has been developed which is said to enable three men to do the work that ordinarily took 100.

A French naturalist states that on walking from sleep ants yawn and stretch their legs like human beings.

Funds Are Lacking

Proposed Establishment Of Central Library Agency Off For Present

The Carnegie Corporation of New York stands ready to establish a central library agency for Canada, at a cost of more than \$100,000 for the first five years, if guarantees are forthcoming that the project will receive adequate financial support from Canada at the end of the five-year period.

So stated John Ridington, University of British Columbia librarian, who returned from a conference in Chicago with Dr. Frederick Keppler, president of the Carnegie Corporation.

The scheme was temporarily abandoned, Mr. Ridington said, when he could give no assurance that either the federal government or provincial governments would continue the grants. Discussions will be resumed next year after further investigation in Canada.

The agency would be established in Ottawa and "would act as a focal point for all library activities in the Dominion. It would be a co-ordinating and educational force and do bibliographical work," the university librarian said.

Chalk Fall Creates Island

No One Hurt In Cliff Slide On English Coast

A new island appeared in the English Channel between Dover and Deal when thousands of tons of chalk at Larkland Point peeled away from the cliff and hurtled into the sea with a great roar.

Collaps of the cliff was the greatest fall on the English coast for many years. At high tide the chalk forms an island 300 feet from the mainland. No one was hurt in the slide.

Grasshopper Menace

Migratory Variety, It Is Feared, Will Cause Great Damage

Warning that grasshoppers threatened heavy crop damage next year were heard as representatives of several states and Canada considered how to combat the insect. Ernest L. Johnson, of the entomological section of the U.S. Department of Agriculture, said the insects had been most numerous at Farley, N.D., at the east of the Greater North Dakota Association state-wide organization of civic and industrial leaders.

Dr. J. R. Parker, senior entomologist of the Federal Department of Agriculture, said there was a trend from comparatively harmless types of the insects toward migratory varieties causing great damage.

Dr. Parker referred to the situation as perhaps rivaling that of the '70's when grasshoppers ravaged parts of Canada and the Mississippi River Basin.

R. C. Bird, Dominion Entomologist, spoke for the Carnegie Corporation.

Keeps Tab On Bullet

Kansas Boy Has Carried One In Heart Covering Three Years

Virgil Bennett, 21-year-old farm boy, of Halls Summit, near Kansas City, Mo., just undergoing periodic X-ray examination to determine if a bullet he has carried around with him for three years still is in his heart. It is.

Bennett was shot accidentally in the neck three years ago as he prepared to go hunting. The bullet ranged downward and an X-ray examination revealed it had lodged in the fibrous heart covering. An operation would have been useless, doctor decided, and so they left the bullet alone.

Although young Bennett does heavy farm work the bullet has never caused any trouble. He undergoes periodic X-ray examinations, however, to keep tab on the whereabouts of the bullet.

People Selling Old Gold

High Prices Bring Jewelry To Royal Canadian Mint

Jewelry is flowing into the Royal Canadian Mint, at Ottawa, with gold selling at over \$33 an ounce. The high prices are bringing out ancient watch cases, the long-treasured rings, the heavy brooches, and the old-time watch chains.

The Dominion Bureau of Statistics announced that jewelry and scrap containing 45,317 ounces of gold had been received by the Mint during the first nine months of this year. This would probably bring around \$1,250,000.

The flow is continuing to increase. In August 12,502 ounces were received, and in September 15,708 ounces. The October figures are not yet available.

Bargains Draw Crowd

When a North London tailor shop recently offered a suit for four cents 500 men were waiting in line when the sale started. One man had slept on the doorstep all the night before. Trousers were offered at eight cents a pair and overcoats at 12 cents. The clothing was of fairly good quality and had been obtained from a bankrupt stock.

Alfred Nobel, the man who discovered dynamite, and the first to introduce smokeless powder, left over £1,500,000 for prizes devoted to industrial peace, humanity and literature.

He has rented a house in Brighton, Sussex, and is shown above with his wife and daughter in their English residence.

A Successful Tour

Nearly 40,000 People Attend Forestry Car Lectures Last Season

Nearly 40,000 people attended the lectures on the Canadian Forestry Association Tree Planting Car during the past season, according to the report of Alan B. Beaven.

The car left Regina March 25, and travelled for four months over the C.P.R. lines and then for three months over the C.P.R. lines.

It visited 28 centres at which 250 lectures were given. Often 200 people crowded into the car to hear the lecture and see the movies, scenes from every province in the Dominion, and beautifully colored slides from actual photographic taken in Saskatchewan, showing home beautification.

One hour of actual lecturing on tree planting and its benefits, particularly for shelter belts, home, street and public building beautification as well as for churches, cemeteries, etc. was given. Question periods followed each lecture. Invariably 30 or more especially interested listeners took part in the resultant discussion.

Civic authorities were assisted with plans for civic tree planting and beautification. Similar assistance was given to many farmers whose grounds were visited by the car staff.

Four hundred and sixty letters of inquiry and other information were answered, in addition to personal calls.

School principals and teachers declared holidays that children might attend. Special question period added to children's lectures for benefit of older pupils. Hints and assistance given for planting of trees and shrubs on school grounds.

Many orchards were sprung up as a result of protection afforded by shelter belts which in turn had been inspired by earlier tours of the forestry car.

The car returned to Regina, Oct. 25. Mileage covered was 2,217 miles.

Express Thanks

Saskatchewan Wheat Pool Delegation

Grateful For Assistance Given

On behalf of their farmer organization, the delegates of the Saskatchewan Wheat Pool at Regina, expressed deep appreciation to the people beyond this province who have given assistance to the drought-stricken areas of Southern Saskatchewan. A motion of thanks introduced by two delegates from the affected areas was adopted unanimously.

As it was pointed out, the other provinces of Canada, from coast to coast, had come to the relief of those in the drought areas, particularly by sending grain and machinery to the affected areas. The Canadian government, by uniting with the provinces, has been instrumental in preventing further economic failures, by supplying them with cars of fruit, vegetables, clothing, etc., realizing what this help meant to southern Saskatchewan people in a period of great distress. The delegates wished to make known how keenly they appreciated the action of their fellow-countrymen.

The question was introduced by Dean E. A. Howes of University of Alberta faculty of agriculture. He declared a great deal of money could be saved each year if the matter was thoroughly investigated by the committee and the farmers educated to more judicious use of their money.

Main purpose of the meeting attended by representatives of 15 agricultural colleges, is to review the agricultural situation in Canada as a whole, with the idea of bringing about a general reduction in production costs and improvement in the quality of farm products.

Proposal To Establish An Educational Foundation As

Memorial To Farm Leader

Hunted Cattle For Hides

For 200 Years Argentine Ranchers Cared Little For The Meat

Fred G. Johnson, says the National Geographic Magazine's chief occupation among the gaucho or cattle ranchers of the Argentine pampa was the pursuit of wild cattle. Stupendous numbers were slain merely for hides and tallow, as was true in California when Danie saw it and wrote "Two Years Before the Mast."

Besides the many hides sent to Spain and smuggled out to other lands, countless thousands were used on the pampa for making clothing, hats, traps, sleds and even fences.

Cattle were so cheap that a rider would kill one merely to cut meat enough for his lunch. One Argentine historian says soldiers used to shoot a beef so that they might tether horses to its horns, there being no trees.

It was easy to capture them. A band of gauchos simply surrounded the herd. Then each man, armed with a long-bladed knife, charged lance, with a band of blades like a half moon had strung across his back, and charged into the herd brood-wise. This done, the gauchos dismounted, skinned the fallen animals, and abandoned the meat to carrion birds and wild dogs.

Hides took the place of money. When, by the treaty of Utrecht, England attained the sole right to import slaves into the River Plate colony, she stipulated that the cattle should be paid for with hides and tallow.

From hunting cattle mostly for their hides, the folk of the pampas turned by 1830 to the export of dried meat. This went to feed slaves in the West Indies, where their labor was then building up the tobacco and sugar industries. "Jerky" (salt beef) is still made by the ton in the meat drying shed on the big estancias, and sometimes huge racks of it, like haystacks, are piled with meat and tallow.

"Brampton Basilus," a Jersey who has won the world's record for milk and butter production in a single year, was given a house at a banquet held at Brampton, Ont. Her owner, D. O. Bull, started to thank the ladies of the St. Saviour's Women's Institute for providing the repast.

"Moo--," interrupted "Brampton Basilus." Mr. Bull didn't finish his speech.

A half-pint of milk in bottles, part of the enormous output of 18,102 pounds of milk which "Basilus" produced in a 365 days' test, was given to each guest.

Among the guests was Hon. Robert Weir, Federal Minister of Agriculture.

By an unanimous vote, delegates of the Saskatchewan Wheat Pool, at their annual meeting in Regina, approved the establishment of an educational foundation, probably to include all three prairie provinces as a memorial to the late A. J. McPhail. Mr. McPhail was first president of the organization and of Canadian Co-operative Wheat Producers, Limited.

Accordingly, steps will be taken immediately to secure contributions to a fund to be known as the McPhail Memorial Foundation.

The objective of the foundation would be, by means of an educational programme, to perpetuate the memory of an outstanding Canadian. This programme would be designed to serve: (1) The development of a fuller appreciation of the principles of co-operative effort; (2) A higher standard of living for the people of western Canada; with a greater share in the comforts of civilization and an opportunity to live a fuller, freer, and happier life; (3) The building up of a wider recognition of the finest quality of citizenship as between rural and urban dwellers; to the end that equality of opportunity may be forthcoming to all classes of citizens.

The other provincial pools have indicated they are prepared to co-operate in the establishment of the foundation.

The committee suggested that the educational activities of the McPhail foundation might include—easy contests in schools; promotion of study groups among the agricultural populations; award of scholarships and lectureships in western Canadian universities; placing of suitable reading material in public school libraries of the west; junior and senior experimental and research work in agriculture.

Cow At Banquet

Brampton Honors Jersey Cow Who Broke World's Record

"Brampton Basilus," a Jersey who has won the world's record for milk and butter production in a single year, was given a house at a banquet held at Brampton, Ont. Her owner, D. O. Bull, started to thank the ladies of the St. Saviour's Women's Institute for providing the repast.

"Moo--," interrupted "Brampton Basilus." Mr. Bull didn't finish his speech.

Among the guests was Hon. Robert Weir, Federal Minister of Agriculture.

Placing The Blame

Not Generally Known That A Woman Introduced The Stiff Collar

When men curse the inventor of stiff collars, they are cursing a woman—though doubtless few of them know it. She was an American, Mrs. Hannah Montague, the wife of a blacksmith. She was wearing a stiff collar—so tight so that the shirt was nearly always more than the shirt itself. So with a sudden inspiration, she cut off the collar and put bands round the necks. Then she starched the collars. They stayed clean longer. Mr. Montague was agreeably surprised. He told friends, "That was a century ago. A tablet on a house in Troy, New York, still bears witness to the memory of the inventor of stiff collars."

Act To Be Repealed

Hon. John Hart, British Columbia Minister of Finance, stated the appeal of the provincial government against the decision of Magistrates J. A. Findlay declaring the meat tax to be ultra vires and which was to be held in Vancouver shortly, will be abandoned and the act repealed at the next session of the legislature.

The first man to use a microscope to study causes of disease is believed to have been the Jesuit priest, Athanasius Kircher, who lived in the seventeenth century.

Wool grading has stimulated the consumption of Canadian wool in Canada and has at the same time provided a steady outlet in the United Kingdom and foreign markets.

A heat of 675 degrees Fahrenheit is required to make mercury boil, while water boils at only 212 degrees Fahrenheit.

WORLD HAPPENINGS
BRIEFLY TOLD

Sir Henry Seymour King, 81, director of Lloyd's Bank, and one of the most prominent financiers in England, is dead in London.

Homes to the number of 636 were filed on in Alberta during August and September. This was taken up by 89 women in this manner.

Sir Robert Borden, president, Arthur B. Purvis, Montreal, vice-president, and the board of directors were re-elected at the annual meeting of Borden's Bank (Canada).

Finland, and not Russia, is Canada's chief competitor in the lumber market of Great Britain, states James Harry Smith, Liverpool, England, managing director of a firm of British lumber importers.

On November 19 British Columbia's provincial police force, oldest of its kind in Canada, observed the 75th anniversary of its recognition as a force to maintain law and order in the province.

About \$3,000 of the \$3,536 obtained in the Bank of Montreal holdup at Vancouver has been recovered with the arrest of three men, according to Deputy Chief John Murdoch of Vancouver force.

Without a friend or relative to mourn his passing, Sir James O'Donoghue, a boyhood companion of King Edward VII, was buried in Toronto. A newspaper reporter and three employees of a funeral chapel were present.

The October revenue of the Dominion government from customs and excise was \$2,564,477. In the month of October, 1929, says a report issued by the Department of National Revenue, the total was \$10,503,482, and in October, the year before, \$16,934,004.

Formerly chief pilot for the Explorers' Air Transport, Limited, and well-known in northland flying circles, pilot Lewis Leigh has left Edmonton for Brandon, Man., where he has been appointed flying instructor of the Brandon Aero Club.

R. D. Fenerty was chosen Rhodes scholar from the University of Alberta at a meeting of the selection committee. The new Rhodes scholar is 22 years old and the son of Lloyd H. Fenerty of the legal firm of Fenerty and McLaurin, of Calgary. He received his B.A. degree in 1931 and his law degree this year.

London now has only 95 houses for every 100 families.

Indigestion, Gas

Mrs. Elizabeth Stewart of Hamilton, Ont., says: "I have a bad case of indigestion. The while, and was continually bloated. As a result, I had to go to bed frequently. But Dr. Pierre's Cisite, Buffalo, N. Y., Discovery, built up my system and entirely removed the trouble. I am now well and have no more trouble. Dr. Pierre's Cisite, Buffalo, N. Y.

Canadian Beef Preferred

Store Cattle Bring Good Price On Scottish Markets

Canadian store cattle occupy a favorable spot in Scottish markets and invariably sell at a slight premium over Irish cattle, A. J. Tingley, assistant trade commissioner in Scotland, writes in an article for the Commercial Journal.

It is realized, however, Mr. Tingley says, the Canadian market, like the market in Scotland, prefers young, well-bred cattle and, unfortunately, the surplus of these for export does not provide a sufficient number to ship only this class.

Until Canadian breeding generally is on a higher level, some of the rougher class will find a way to the British markets. Too much stress, however, cannot be placed upon the necessity for Canadian farmers to continue to improve their breeding herds, the commissioner writes, and for shippers to send over only young bullocks of good class and quality.

The type of animal in most demand is a young bullock approaching two years of age, from eight to nine cwt. in weight and of good class and breeding, the writer says. Aberdeen-Angus or Shorthorn crosses are preferred, he writes.

LOVELY NEW NEGLIGEE THAT WRAPS THE FIGURE IN SLEEK SILK SMOOTHNESS

The original in bright green crepe silk was decidedly young and smart. The trim was in deeper green shade, matched by decorative bone buttons.

The fitted hipline gives emphasis to the tight basque effect of the bodice. The sleeves have a nice fullness.

It is altogether charming and so suitable for day wear.

Style No. 544 is designed in sizes 12, 14, 16, 18, 20, years, 36 and 38 inches bust.

Other fascinating schemes are bright blue crepe silk plaided silk, royal blue crepe satin and black crepe satin.

Size 18 requires 4½ yards 39-inch fabric.

Price of pattern 20 cents in stamp or coin (coin is preferred). Wrap coln carefully.

PLACE EXCHANGE DUMPING DUTY ON IMPORTS

Ottawa, Ont.—Action to impose an exchange dumping duty on imports from the United States "of a class or kind made in Canada" was taken by the Dominion government.

The government declared the United States dollar to possess a value of 100 cents Canadian currency for duty purposes. The effect of this is that the difference between the current rate of exchange and par will be collectable as an exchange dumping duty on imports from the United States of all goods of a class or kind made in Canada.

Since the United States dollar began to depreciate in value, the government has been watching the situation closely. At the present time the United States dollar is at a discount of approximately 2½ to 3 per cent. in terms of Canadian currency. This margin, which offsets the protection afforded to Canadian manufacturers by the tariff to the extent of the difference between the relative currencies, was evidently regarded by the government as sufficient to warrant action. An order-in-council fixing the value of the U.S. dollar for duty purposes was consequently put through.

Indications are that the government of the United Kingdom contemplates measures to meet the situation as it affects that country. At present there is a six per cent. discount as between the United States dollar and sterling.

United Kingdom Sees

Activity In Industry

Increase In Railway Traffic And Other Improvement Noted

London, Eng.—From several directions have come indications of the United Kingdom's steady advance in greater industrial activity.

All four of Britain's great railway groups issued traffic figures showing considerable gains over those for the corresponding week last year. A "buy British" train will start early in the new year on a tour covering the whole southern district of England, calling at 60 important commercial centers.

Savings banks reported greater business and revenue from amateur taxes was said to have risen.

A great steel firm will begin immediate construction of a plant near 50 miles of steel pipe for armaments which, from the days of King Herod, has depended for its water supply on wells and springs. Another firm has received a contract worth more than \$1,000,000 to equip telephone exchanges in Lithuania.

Federal Aid

Financial Assistance For Saskatchewan Government Considered At Ottawa

Ottawa, Ont.—Financial assistance to the Saskatchewan government was considered by the Dominion cabinet and action taken, but no details could be secured. The prairie province will have as difficult a problem this winter as it faced last year, because of the drought and grasshopper plague which caused an almost complete crop failure.

Representations were made to the Dominion Government some days ago seeking assistance along the same lines as last winter.

It is understood the government took action Thursday to advance a portion of the money the province will need to care for the farmers in the stricken areas, and that further relief will be granted from time to time.

Two officials of the government recently concluded a tour of Saskatchewan crop failure areas and made a report which indicated that the relief costs in that province would be as heavy this winter as last.

Western Provinces Benefit

Saskatchewan, Alberta, And B.C. Share Manitoba Coal Contracts

Winnipeg, Man.—Coal mines in Saskatchewan, Alberta, and the Crow's Nest Pass section of British Columbia will benefit through the award of contracts by the Manitoba government for 16,000 tons of coal.

Even more important is a share of the contracts. The contracts stipulate the coal to be delivered, and the points include McCallum Creek and Michel, in British Columbia; Bellevue Alberta, coal and Camrose, Alberta, briquettes, and Saskatchewan Sulfur coal.

W. N. U. 2022

Grain Awards

Westerners Annex Many Honors At Royal Winter Fair

Toronto, Ont.—H. G. Neufeld, Coedette, Sask., had the best spring wheat in the registered or certified seed class at the Royal Winter Fair here. Second place in this class went to Wm. Whitefoot, of Kelwood, Man., and third to R. H. Carter, Muscow, Sask.

Reward wheat, Hardington Bros., of Leaside, Alberta, had the finest exhibit and Axel Bergqvist, of Sanford, Man., captured honors in the Minnow class.

Western Canada entrants topped all others in the white oats section of the seed grain in the Royal Winter Fair. H. H. Taylor, of Lashburn, Sask., led a list of 26, while second and third places fell to Lester Ball, Edmonton South, Alberta, and H. C. Neufeld, Coedette, Sask., respectively.

In the barley, six-rowed sections, D. L. Scott, City View, Ont., was awarded honors over Nels Linden, of Wetaskiwin, Alberta.

A. Griffin, of Brooks, Alberta, annexed premier honors in the field beans (small white division).

Durum wheat, entered by John H. Tevis, Crystal City, Man., was considered the best sack of grain in its class at the fair.

In the spring wheat section, the Smith Family, Limited, Leaside, Alberta, H. G. Neufeld, Coedette, Sask., and Walter Margeson, Pavon, Sask., were awarded first, second and third, respectively. Two other western Canada entries, Wm. J. Rigby, Wembley, Alberta, and Stephen C. Harrington, Marwayne, Alberta, won fourth and fifth places.

Germany Asks Return Of Saar Territory

Greatest Obstacle To Accord With France States Hitler

Paris, France.—A government spokesman said that the French do not care to Chancellor Hitler, or Germany, if he cares to offer an olive branch.

This authoritative invitation was made as a comment on an interview with the German chief by Dr. Brinon, a close friend of former Premier, Edouard Daladier, published in the newspaper, *Le Matin*.

The interview quoted Hitler as offering peace and security to France in return for equality for Germany.

Le Matin said Hitler visualized the greatest obstacle to accord between France and Germany as the question of the Saar Territory, now held by France. The French government spokesman said, "The question is whether Chancellor Hitler will submit to the supervision of the armaments we know he is building."

"I am convinced," said Hitler, "that once the question of the Saar—which is German land—has been settled, there is nothing, absolutely nothing, which can oppose Germany to France."

Despite Germany's desire to avoid war, which the chancellor said "would settle nothing and only make worse the state of the world," Hitler reiterated his intention not to return to the League of Nations.

It has aggravated instead of clearing up the misunderstandings of the world," he said.

Likely To Be Ignored

No Comment Made On Outburst By British Government

London, Eng.—Apparently nothing more will be heard of the occurrences in the House of Lords as parliament opened when John McClelland, fiery Labor leftwinger, burst out in front of the King and Queen and the assembled nobility of England, at the conclusion of the speech from the throne, with a denunciation of the peers and peers as "parasites" living on the wealth created by the people "while the people starve."

The House of Commons adjourned debate on the address in reply to the speech from the throne without any reference to the incident being heard in the House.

Fast Driving

Motorists From Vancouver To East Claim They Beat Train

Barrie, Ont.—Driving day and night on their trip from Vancouver, two youthful Barrie motorists claim they made faster time than the fast transcontinental train.

The youths, Vernon R. Taylor and Douglas Campbell, arrived here Tuesday night and said they covered the 3,397 miles in an elapsed time of 108 hours and 71 hours actual driving time. A letter they mailed in Vancouver had not been delivered in Barrie when they arrived.

Dr. MacMurphy Retires

Has Been Head Of Child Welfare For Last Thirteen Years

Ottawa, Ont.—A kindly and aggressive personality in child welfare work, Dr. Helen MacMurphy has been retired from the Department of Pensions and National Health. Since 1920 she has been chief of the division of child welfare in Ottawa. She is taking up her residence in Toronto.

Last summer Dr. MacMurphy made a notable speech Winnipeg before the Federated Women's Institutes of Canada on the Mother, the Children and the New World Order. It is a gripping address which was later circulated in printed form throughout the country.

Dr. MacMurphy has written some 25 books and pamphlets. She graduated from the University of Toronto in 1901 and did post graduate work in famous hospitals of the United States.

As head of the Child Welfare division here, she was energetic in the prevention of infantile paralysis.

DISARMAMENT CONFERENCE TO TAKE RECESS

Geneva, Switzerland.—Formal work of the world disarmament conference was suspended until mid-January, by a vote of its steering committee, to permit diplomatic negotiations aimed at saving the parley and getting Germany back.

The committee accepted unanimously a statement by Arthur Henderson, British chairman of the conference, that there shall be "parallel and supplementary effort between the various states and the full use of diplomatic machinery conducted energetically to advance in every possible way the work of the conference."

It was learned that France particularly is inclined to draw a parallel between the political positions of Germany, which withdrew from the discussions last month, and Japan, and is convinced that disarmament efforts, to succeed, must be of universal scope. In this British delegates were said to concur.

The full negotiations, it was learned, will be directed toward rebuilding a Franco-British joint policy and then extended to Italy and finally to Germany.

It was authoritatively stated that Great Britain and France, without agreeing on details, had already reached an understanding on their expected common policy based on a principle that they will not be influenced by any German "threat."

Premier Mussolini, of Italy, who is known to have suggested a four-power parley in Italy, was pointed to as a possible mediator between France and Britain on the one hand and Germany on the other.

Favors Central Bank

Montreal, Que.—The Canadian banking system is sound and little need of organization, said Sir Maurice Bonham Carter, London financier, in an interview here, but establishment of a Canadian central bank would greatly aid the "uniform stabilization of finance throughout the British Empire."

Studying The Weather

People Do Not Realize Work In Connection With Forecast

People do a lot of talking about the weather, but, as someone has said, "nobody does anything about it." Scientists are helpless in regard to weather. The only way they can help is by making forecasts, as to what sort of weather it will be tomorrow or the day after, then we can take an umbrella with us or leave it at home according to our trust in the "probs."

It is very comforting to be able to look at the daily paper and there in less than a dozen words find the weather outlook concisely submitted. Few, however, have any conception as to the amount of travel, hardship, research and unscrupulous of data, worse than any jigsaw puzzle, involved in assembling and presenting the information to the public.

A party of Canadian meteorologists recently returned to civilization from the districts of Chesterfield Inlet and Coppermine where they spent over one year. Chesterfield Inlet is within 500 miles of the magnetic pole, and Coppermine is also within the Arctic circle. They were part of an International exploration party to which the United States, Great Britain, France and Denmark also contributed parties in different regions. They lived on canned foods and such meat as they could get by fishing or hunting. They had no fresh vegetables or fruit all that time.

What did they do? Studied water currents, frost, ice, clouds, winds, air currents, temperatures, the sun and moon, magnetic influences, the aurora, and whatever else the Arctic has to offer. They took 700 photographs of the aurora, and 4000 pictures of clouds, besides making charts daily and weekly, all of which would be unintelligible to the man in the street, and which will take even a scientist many months to unravel and co-ordinate. But when everybody's data has been reduced to understandable terms, our weatherman will be able to supply more accurate information as to the "probs," which will be of advantage to airmen, to farmers, and last but not least, to the family which plans a picnic for the morrow, or the woman who wonders if it will be all right or not to put the washing to dry.

Just think of that when you give a casual glance at the "probs," put so conveniently before you—*St. Thomas Times-Journal*.

B.C. Motor Licenses

Windshield Stickers For Those Who Made Prompt Payment

Windshield stickers authorizing automobile operation for January and February of next year will be issued to British Columbia motorists who paid their 1933 license fees before March 1, as British Columbia provincial police institute a novel method of encouraging early payment of fees, according to Inspector G. A. Hood of the motor branch.

Stickers will also be issued to those taking out licenses after March 1 on payment of one-sixth of the fee, the inspector said. Under new government regulations, motorists must either pay full fees by March 1 of next year or lay up their cars until April 1 and pay 11-12ths of the fee before resuming operation at that time.

A concession will be made to motorists residing in deep-snow districts. Owners of cars east of the Cascade range may lay up their vehicles after Nov. 1, 1934, send their plates and licenses to the motor branch and receive a refund for four months.

Birds Fly Long Distance

The golden pheasants have arrived in Hawaii for the winter after their customary 2,000-mile non-stop flight from the Australian mainland. Harry Harvey, sportsman, who has been studying their migratory habits for thirty years, said that the game birds are reputed to make the Pacific flight from the Bering Sea in twenty-four hours by flying at ninety miles an hour in the high air currents.

The nice old lady smiled at the life girl who had been left in charge of the confectioner's shop.

"Don't you sometimes feel tempted to eat one of the cream buns, my deary?" she asked.

The little girl was quite shocked. "Of course, not. That would be stealing. I only lick them."

Husband (tripping over loose carpet): "I shall lose my temper with my carpet in a minute!"

Wife: "That's right, dear do. Then take a stick and give it a jolly good riding out on the lawn."

No one ever frowned his way to happiness.

Artificial Eyes

Great Skill Is Now Used in the Making Of Substitute Optics

At least 5,000 people in England lose an eye every year. Three out of four of these unfortunate are women. This losing of eyes is no new thing. There is a Mr. Taylor in New Oxford Street, London, who is busy from one year's end to another making artificial eyes. He comes of a family who have been engaged in this unusual occupation for the past 150 years.

So much art is brought into the making of artificial eyes nowadays that it is impossible to detect the imitation from the genuine article. The infatuated young man who warbles "the lovelight in your eyes" to his beloved might be correct only if he spoke of eyes in the singular.

Film stars and lesser celebrities move amongst us today with a glass eye posing as the real thing. What is more, they are getting away with it.

The modern artificial eye is so fixed to the eye socket that the eye moves from right to left, up and down just as does its real counterpart.

A magnifying crystal, placed just over the eye, causes the pupil to dilate and contract in changing light exactly like the real thing.

People who wish to sleep wearing an artificial eye have to procure special eyes for the purpose. They are smaller than the daytime eyes.

French Schools Must Now Teach Swimming

No Teacher Knowing How Can Hold Position

Before an instructor can teach mathematics and spelling he must know how to swim. That's the verdict today by Hippolyte Ducois, sports-minded under-secretary of state for national education. Ability to swim is going to be made part of the necessary qualifications to teach French schools.

Ducois pointed out that France has an ocean and a river on two sides of it, and rivers criss-crossing it in every direction, so few Frenchmen, comparatively speaking, can stay in the water without sinking. Students must learn to swim as part of their course, he has opined, and for that their teachers must set the good example.

Ducois announced his decision after consulting prefectural governors, educational leaders and professors of physical training. He made a census of how many teachers in France can swim themselves. The census was not at all satisfactory.

A diploma in swimming will be awarded by the nation as part of the movement. Ducois is going to ask parliament to provide the money for constructing sports stadiums and swimming pools throughout the country.

A New Vocabulary

Stated That Oxford Dictionary Has Added Some New Words And Phrases

Recognized throughout the world as the outstanding authority on the English language, the Oxford Dictionary has "gone Hollywood," says a special cable to the New York Herald Tribune from London.

In its latest 900-page supplement the editors include a large number of words and phrases which, introduced here mainly through the "talkies" have passed into common usage.

Examples are "debut," "bump off," "wow," "wheezeck" and "taken for a ride."

Caterpillars Spin Lace

Not long ago a man in Munich taught caterpillars to spin lace veils. He spread a food paste over a flat stone and then drew a delicate design upon it in an oil they would not touch. As the caterpillars ate the paste, they wove the pattern with the silk which they spin through the lower lip.

Iron Deposits In Labrador

Vast Iron deposits covering miles of territory in Labrador's interior should form the basis of a busy industry when the rugged north country is finally opened up, according to Matthew Mitchell, who has returned to St. John's, Newfoundland, after spending the summer in Labrador.

Shorthand In Irish

Following the order that all government employees of the Irish Free State must carry out their official duties in Irish, classes in shorthand and typewriting in Irish are being started by the City of Dublin vocational committee. The enrollment has been large.

Sister—"I love your daughter dearest, sir. I would suffer if I should cause her a moment's sorrow."

Father—"You said it, sonny. I know that girl."

Partners of Australia are enjoying a return of prosperity.

WHEN ENGLAND'S DIMINUTIVE JOCKEY ESTABLISHED NEW RECORD

Our picture shows Gordon Richards, England's champion jockey, after he had established a new British record by riding 247 winners in one season.

Prehistoric Find

Ancient Kettles Are Unearthed At Hudson Bay Junction

Two copper kettles of a type used centuries ago have been found on the farm of Robert McCormick near Hudson Bay Junction. Fires which burned off the surface of the soil disclosed the ancient utensils to view. It is thought the kettles have been buried too long to have been the property of the earliest fur traders or explorers, and one theory suggested is that they were left on or near the shore of the ancient Lake Agassiz. McCormick's farm is within four miles of a shoreline of this prehistoric lake.

The kettles are in a good state of preservation. They are being refurbished by Jack Wells, pioneer blacksmith of Hudson Bay Junction, and will be placed on display in the office of the Junction Judge, local newspaper.

Paris Has Deep Well

Sunk 2,850 Feet And Is Fed From Subterranean Water

Paris is boasting that it has the deepest well in the world. This new source of supply for the northeastern corner of the city is sunk 2,850 feet and will yield 1,600 gallons a day. The well is fed from a sheet of subterranean water that extends at a variable depth under the French capital. A well in the Ardennes District is the deepest in the world.

The source in the Ardennes Mountains has long been known; a hundred years ago several localities availed themselves of it.

Swedes Are Growing Taller

Last Forty Years Shows Marked Increase In Height

The Swedes have been growing taller continuously for the past 40 years, according to statistics compiled by the central Bureau of Statistics in Stockholm. The statistics are based on the height of young men called in at the age of 21 for military service with all parts of Sweden.

These figures show that the average height of the Swedes between 1887 and 1931 has increased by nearly four centimeters (about 1½ inches).

So does the instrument synchronize with the movements of the earth that once focused the telescope will remain in focus for hours.

The finished lens is seven and one-fourth inches in diameter. So nearly perfect a job did the boys do in grinding and surfacing it with silver that its light reflection is more than 90 per cent.

A Slight Difference

The lady appeared at the paying teller's window, and inquired "How much money did my husband draw out of this bank last week."

"I am unable to furnish you such information," replied the man.

"Well, aren't you the paying teller?" inquired the lady.

"Yes, madam," was the rejoinder, "but I'm not the telling payer."

In Asia, which contains half of the population of the world, the mother and the wife holds first place in a man's affections throughout his life.

"I am unable to furnish you such information," replied the man.

"Well, aren't you the paying teller?" inquired the lady.

"Yes, madam," was the rejoinder, "but I'm not the telling payer."

RUN DOWN? TAKE WINCARNIS

If work and worry have got the better of you and you are feeling weak and listless, follow the recommendation of more than 20,000 medical men. To thousands who once felt as you feel now, this advice has proved invaluable. Wincarnis brings to you all the valuable properties of the kidney (one each bottle), and the strength building content of beef and malt extract. It is not a drink but a delicious blood tissue builder. Wincarnis quickly soothes tired nerves and builds new wells of energy.

When you start taking Wincarnis you will sleep better, wake more cheerfully, and feel more nearly as you should. You will know, then, that Wincarnis is the road to sustained, vigorous health.

For those who are run-down, or who suffer from raged fevers, insomnia, a-mnesia or neuritis. Wincarnis is a marvelous tonic. Get Wincarnis from your druggist today.—Sales Agents: Harold F. Ritchie & Co. Ltd., Toronto.

OCCASIONAL WIFE

By EDNA ROBB WEBSTER

Author of "Joretta" "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt, young and beautiful art student, and Peter Anson, a struggling sculptor, fall in love and marry secretly, deciding to wait until the time Peter can establish himself. Camilla, the adopted daughter of wealthy parents, is not to be moved. She comes of age. She is preparing herself for life with a course in commercial art, hoping to get a job to enable her to support herself. She has been making the rounds of agencies. (Now Go On With The Story)

CHAPTER XIX.

Returning home, Camilla was surprised to discover how tired she was with the day's efforts. Study and classes at school had been peremptory, but there was a vast difference between preparation for work, and work itself, or even obtaining it, she already had discovered. While she dressed for dinner, she reviewed in her mind some of the truths which had made themselves evident to her that day. She had decided that if you were willing to work, there was a place for you. It was obvious that not only was that supposition wrong, but that not even if you were capable of doing the work you chose, you were given the opportunity.

Gazing around at the furnishings of the big luxurious rooms that had sheltered her for so long, and making rapid calculations with the values of her possessions, she was astounded at the time she estimated it would require her to earn the money they represented.

Even if she were given the opportunity to work for pay, how long would it take her to earn what the clothes she was putting on had cost her? Her flick was an imported model. She had a coat, worth five dollars, her shoes, twenty-five; her stockings and lingerie another seventy-five. Her wardrobe and dressing table drawers were filled with such costly garments.

Of course, she knew that when she earned her own living, she would no longer patronize exclusive shops and wear hand embroidered lingerie. But she wondered how many of the women who wore such garments could earn the money for even very poor substitutes, if they were obliged to. With sudden panic, she wondered if she could.

Sitting before the triple cheval glass of her dressing table, Camilla did not see her glowing beauty. She was going into the vast and chaotic abyss that tapered suddenly at her feet, the abyss of life into which she was about to leap. Approaching it, she had been so confident and secure; standing now at the brink and gazing into its abyssal depths, she drew back with horror. Then suddenly, there appeared before her

Kidney Troubles

cause poisons to accumulate in the system and bring on persistent Backache, Lumbrage, Rheumatism, or Sciatica. Take Gin Pills to restore the kidneys to a healthy condition and eliminate the poison from your system.

W. N. U. 2022

Peter's dear and earnest face, the grave eyes twinkling with that smile she loved, and she reached out and clasped his hand, no longer afraid. She was ready to leap into life—with Peter.

Peter was modelling with intense interest, striving for a new effect before the idea should become lost in the otherwise confusion of escaped inspirations that their originators had failed to capture quickly enough. His hands were gray with plastic clay and his mind was projected into the realm of creative fancy. A knock on the door suddenly interrupted the summer morning stillness and drew him back to reality.

His forehead wrinkled with annoyance, for he had no wish to be disturbed. Then the reminder that it might be Camilla who had come to see him, made him call quickly, "Come in." He always wanted to see Camilla, no matter how disturbing she might be.

"That is what I told you to do," he said. "Find a chair, please. As you see, I am—er—busy." Somehow, he felt defensive toward her at once, and his voice reflected his attitude.

"Thanks," she said, crossing the room with casual, lissom movements and sinking into the one armchair which graced the room. "You are Peter Anson, aren't you?" she inquired, raising her very eyes that were deeply shadowed with long dark lashes. Their contrast with the pale gold of her hair was startling.

"I can't deny that," Peter replied.

"I'm Sylvia Todd," she offered.

"Miss Todd, how do you do?" Peter inclined his head slightly. "What may I do for you?"

"Give me some work," she came to the point quickly. "I'm a model, and desperate for work." She took a cigarette from her purse and fired it.

"But what made you think I would have come to the wrong place for that?"

"You have a model now?"

"No."

"Well, you're a sculptor, aren't you? Twice and two make four."

"Exactly. And five and five make ten—that's two days for a model. I can't afford that."

"And where do you expect to get without one?"

"I managed. I did that without one."

He indicated the group in the window above which he had made for Camilla. Miss Todd glanced at it casually. "Not bad. But neither will that kind of stuff get you anywhere."

"You mean nudes?"

"Sure. Symbolic stuff. That's what brings in the dough that makes the cake. And it's my line. Want to see my figure?"

"I noticed it when you walked across the room," diffidently.

She laughed shortly. "You would, of course. Well, how about using it for inspiration? Big Boy? Gee, that would be an inspiration yourself."

"I doubt you could be that," he said for the first time, "but I don't happen to be doing anything that needs it."

"Now is as good a time to begin as any. What about the National Exhibit? I heard you were going to enter?"

"I planned to."

"With what—that?" she nodded toward the immigrant group.

"Oh, no—that is just a personal possession."

"Well, you wouldn't ever get a look-in with that," she shrugged.

"What then?"

"Why, I've had several bounces, but none of them suited me quite, and I'm not sure now that I want to enter the exhibit."

"Afraid you might lose the scholarship?"

"More afraid I might win, if you will pardon my conceit."

She stared at him in surprise.

"Well, are you crazy, or am I cuckoo?"

"Neither, I hope. It just happens that affairs have developed recently to change my plans."

She watched him with a calculating expression for a moment. "A girl friend?"

"You aren't by any chance, a detective?" he inquired.

"If I were," she laughed, "I might not be out of work."

"I don't know," Peter observed.

"The depression has hit everything."

"Don't I know it? Model in particular. Say, listen, Big Boy, when there's work enough to go half way around, this baby has more than she can do."

"I don't doubt it."

Largest Swimming Pool

Building Planned For Wembley Will Cover Over Two Acres

Details of the proposed Empire swimming pool at Wembley have been outlined and it is stated that the building will be nearly half as large again as Albert Hall. It will be 420 feet long and 240 feet in width, and will cover an area of more than two acres.

Its roof span will be 240 feet—80 feet wider than the Main Hall at Olympia. The arena will be 300 feet by 88 feet, and the pool itself 200 feet long and 60 feet wide, with a maximum depth of 16 feet. From the level of the arena to the apex of the roof will be approximately 90 feet.

Wembley Stadium, Ltd., is providing the whole of the money, estimated at \$750,000, for this new enterprise. It is intended to open the pool for the aquatic events of the British Empire Games next year.

There will be 8,000 spectators, each of whom will have an upholstered tip-up seat. Wave-making machinery, which will cause the water to break on sloping "beaches" at either side of the pool, and under-water illumination, will aid in the lure to the bathers, who will also have a dance floor and fully licensed buffets provided for them.

Erect Sub-Arctic Mission

Work Of Two Priests At Repulse Bay Nearing Completion

Finishing touches are being given to a new mission of the Roman Catholic Church at Repulse Bay, lonely northern outpost, high up in the barren lands. Its construction is the work of Father Armande Chebeau and Rev. Father Pierre Henry.

Lumber and material for the building were taken in this summer from Churchill, 800 miles to the south. The mission will be a welcome addition to this small settlement situated at the northern tip of Melville Island.

Priests will minister principally to fur traders and nomadic bands of Eskimos who make frequent visits.

Repulse Bay nestles just south of the Height of Land. It was crossed and recrossed during the thrilling hunt for the lost MacAlpine party in 1929, and has been known to explorers since 1619. Visitors from the "outside" are not numerous.

"I heard you were going to enter the exhibit, and had no model yet. Don't you think I would do?" wistfully.

"You might—if I needed a model," he said thoughtfully, as if he were considering something. Finally, "Tell you what I'll do—let me give you a dollar for some dinner and I'll think it over again. If I decide that I need you and can afford to pay you, I'll let you know tomorrow. That's the best I can do."

"That's awfully sweet of you. But I think you would be positively gooty not to try for the scholarship, if that was your first idea. Don't give it up, please, and if you can use me, I'll make the price as low as possible. After all, one meal a day is better than none."

"To Be Continued."

Peat Bog Good Preservative

Old Coat Found In England Still In Fairs Condition

That fashion in men's cloaks have changed little since the dark ages is shown by a mantle found by peat diggers in a bog near Reepholth, on the Ems-Jade Canal, not far from Wilhelmshaven. Its age is estimated at about 1700 years, but the form is not much different from that of an officer's mantle today. It is astonishingly well preserved, as are objects in general that have lain in peat for centuries.

Legumes, such as red clover, alseike, clover, alfalfa, and peas are most important crops in a rotation, from the standpoint of maintaining the supply of nitrogen in the soil.

Nearly half the women workers in the jam and confectionery industry in England are under 20 years of age.

The only ship that comes in for the man who waits is receivability.

Not The Only Overhead

The good-looking summer boarder was enraptured about "Term life."

"Oh, I'd just love to be a farmer," she purred, "and live with the blue sky overhead always."

"That would be all right," the farmer replied, "if the blue sky was the farmer's only overhead."

Pets As Nuisances

In Milwaukee fines ranging from five to twenty-five dollars are imposed on owners of dogs which howl at night and disturb neighbors, and that seems fair enough. No one has any business keeping a pet which becomes a nuisance to others.

After all, there are some advantages in being a monkey. Nobody tries to make one out of him.

How to Stop a Cold

Quick as You Caught It

Takes 3 Aspirin Tablets.

Drink full glass of water.
Repeat treatment in 2 hours.

If throat is sore, crush and dissolve 3 Aspirin Tablets in a half glass of water and gargle according to directions.

Almost Instant Relief in This Way

This simple method pictured above is the way doctors throughout the world now treat colds.

It is recognized as the QUICK-EST, safest, surest way to treat a cold. For it will check an early cold almost as fast as you caught it.

Ask your doctor about this. And when you buy Aspirin Tablets, Aspirin.

Does Not Harm the Heart.

is the trademark of The Bayer Company, Limited, and the name Bayer in the form of a cross is on each tablet. They dissolve almost instantly. And thus work almost instantly. When you buy Aspirin Tablets, Aspirin.

Aspirin TABLETS MADE IN CANADA

Colony For Mentally Sick

Million Dollar Building For Defectives Opened in England

Sir E. Hilton Young, British Minister of Health, in opening a colony for mental defectives which was instituted at the Heriot-Watt country council, at a cost of \$1,000,000, said the people of the United Kingdom should not be content with the existence of mental deficiency to the degree that is the case in this country.

"For that reason," he continued, "we shall press ahead and search out every possible means of social and scientific work by which we can reduce mental deficiency." He added, "I put in the forefront of the work of the state and the local authorities the prevention of this evil and the necessity of finding the means whereby it may be diminished."

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Bile

—No Colic needed

What you feel blue, depressed, wear on the head, don't you? You're not alone. In fact, two pounds of Liquid bile takes your boulders.

It's a tonic that helps you feel well.

More, however, you like it. Take it with water, or milk, or beer, or orange juice, or fruit juice, or any drink.

You need a few stimulants. Carter's Little Liver Pill is a good one. Take one tablet, four times a day. Ask for them by name. Refuse substitutes. See all at druggists.

Wild Ponies Wiped Out

Nearly Six Hundred Killed By Tropical Storm In Virginia

After surviving winds and storms for generations, the 500 or 600 wild ponies of Virginia were practically wiped out by the tropical storm which recently swept the region. Only three of their number are left. The ponies were descendants of the Arab stock that contrived to reach the shore when the vessel bringing them from Spain to America founders off the Virginia coast over two centuries ago.

The best way to keep a body from becoming a busbody is to keep a body busy.

Debate U. F. A. Gov't. Record

Wednesday night a very interesting
discussion took place in Airdrie, under the auspices of the Local U.
F. A. in which the doings of the
Brownlee Government, during its
tenure of office was the topic.

This form of campaign in days
gone by was very common, but has
long been forgotten, and now that
our economic conditions is in such
a deplorable way, possibly it would be
advisable to revive this form of
campaign.

R. M. McCool, M. L. A. for Coch-
rane Constituency upheld the Gov-
ernment, and D. M. Duggan, Lead-
er of the Conservative Party in Al-
berta, was the speaker opposing.

A fair representation of the
district was present, but for a discus-
sion of this kind there should have
been a full house. Mr. Duggan
spoke for one hour and eight min-
utes, prefacing his arguments under
ten headings, having to do principally
with finance, in which he criti-
cized the Brownlee Government giving
actual figures to substantiate
his statements.

Mr. McCool followed with a very
able defence of the Government,
in every department that Mr. Dug-
gan had touched on.

Mr. Howard Wright of the Air-
district occupied the chair.

Local News

Items for this column are always
appreciated.

Mrs. P. H. Fleming was a Cal-
gary visitor on Tuesday.

The Oneil Christmas concert and
dance will be held on Dec. 22.

Mr. and Mrs. R. M. McCool were

The Women's Guild are holding

their annual bazaar on Saturday, Dec. 2nd. Tea will be served from

10 to 12. They have a splendid as-
sortment of things suitable for

Christmas gifts.

Adam Cruickshank, Frank Brown,

Don McArthur, F. T. Baker and
Harry Fenwick attended the turkey
shoot at Didsbury on Wednesday.

Adam Cruickshank brought home

seven birds, while the rest of the
gang got at least one each.
